

SPECTRA ENTERPRISE — 2026

The full spectrum of digital.

A digital studio that builds across the whole spectrum — websites, apps, brand, marketing, extensions, and the software that simplifies how you work.

White light holds every colour. So does a great digital partner.

A prism takes one beam and reveals the spectrum inside it. Spectra does the same for a business — one team, one relationship, and the whole range of what you need to build and grow online. The brand should always feel **bold, clear, and a little playful** — never corporate, never grey.

Bold

Confident type, generous scale, colour used with conviction.

Clear

Lots of white space. One message at a time. Never cluttered.

Playful

The spectrum brings warmth and joy. Serious work, light touch.

Clear space & construction

Keep clear space around the mark equal to the diameter of its inner aperture. The ring thickness is one-quarter of the mark's diameter — never distort or recolour it outside the approved spectrum.

03 — COLOUR

The Spectrum

Five signature hues sharing one lightness and chroma so they always feel like a family. Favour gradients between them over flat fills — colour should feel like light, never paint.

Canvas #F7F4EF	Surface #FFFFFF	Ink #15141A	Ink Soft #6B6874	Hairline #E7E1D8

Colour that behaves like light.

The signature gradient runs coral → amber → jade → azure → violet. Use it for hero moments, the mark, and key surfaces — sparingly, so it stays special.
